Alstom power ab South Sudan

Overview

Can South Sudan generate electricity from hydropower?

South Sudan holds the potential to generate over 2,500 MW of electricity from hydropower, mostly in its equatorial region. Fula, Shukoli, Lakki, and Bedden are among the largest project sites that have been identified on the Nile River with the potential to be developed and are estimated to generate 2,927 MW of power.

How can South Sudan increase electricity access?

In a bid to increase electricity access in South Sudan, State company South Sudan Electricity Corporation plans to develop a 120 MW hydropower plant and to roll out planned regional interconnection transmission line projects.

Why is South Sudan so rich in hydro?

“South Sudan is very rich in terms of hydro because we have the potential; this is where we are going to increase access to 50%,” he said. The existing 296km, 230kV Ethiopia-Sudan interconnection transmission line also faces plans for expansion, although materialization of the project remains dependent on investment.
