American Samoa vt power station price

Overview

ASPA uses an inverted block tariff structure that starts at \$0.29 USD/kWh for residential; \$0.24 USD/kWh for commercial; and \$0.26 USD/kWh for industrial.

ASPA uses an inverted block tariff structure that starts at \$0.29 USD/kWh for residential; \$0.24 USD/kWh for commercial; and \$0.26 USD/kWh for industrial.

In 2022, the territory's average electricity price was almost 45 cents per kilowatthour, about 3.6 times higher than the U.S. average. How much does electricity cost in American Samoa?

Electricity prices in American Samoa vary with world petroleum prices. In 2021, the territory's average electricity price was more than 31 cents per kilowatthour, about 3 times higher than the U.S. average.

What kind of energy does American Samoa use?

American Samoa uses imported fossil fuels for almost all of the territory's energy needs, including transportation, drinking and waste water treatment, and most (about 97% in 2020) of its electric power generation. Electricity prices in American Samoa vary with world petroleum prices.

Does American Samoa have energy issues?

Although energy burdens pose a real challenge in American Samoa, the territory is working to advance energy justice. For example, the Territorial Energy Office provides home energy efficiency programs to help reduce energy costs for low-income households.

Does American Samoa have a geothermal energy plan?

The 2016 American Samoa Energy Action Plan identifies some geothermal resources, but none of these are viable for commercial electricity generation. The 2016 plan instead emphasizes the development of wind and solar power (Ness, Haase, and Conrad 2016). American Samoa is exploring opportunities for both offshore and onshore wind power generation.

Where does American Samoa get fuel?

Fuel for American Samoa comes from Singapore with Busan, South Korea as an alternate provider if needed. In the case of fuel disruption, Pacific Energy prioritizes serving ASPA to ensure power and water treatment services are not interrupted (Pacific Energy representative, personal communication, August 9, 2023).

Why are electricity prices spiking in American Samoa?

Electricity prices in American Samoa are subject to global commodities market fluctuations and fuel surcharges. The average price of electricity to ASPA end-use customers in cents/kWh decreased from 2012 to 2021 before spiking in 2022 due to an increase in global fuel prices (EIA 2023c).
