Are rooftop solar panels right for You?

Rooftop solar panels aren't the perfect fit for everyone, but that's okay. Like any other home electrification product, solar panels provide clear benefits to homeowners needing energy upgrades and electricity bill reduction. The pros of solar outweigh the cons in most situations.

Are solar panels right for You?

You'll want to understand solar's disadvantages before deciding if it's right for you: 1. Solar panels don't work for every roof. If you have a south-facing roof sloped between 15 to 40 degrees, you're in great shape for solar. Even with an east- or west-facing roof, or one that's flat, solar's likely still worth it.

Are solar panels still a viable option?

In the same breath, with solar panels in the mainstream limelight, most negative perspectives have encouraged industry action to make changes and adaptations, so that solar panels remain a brilliant (and financially viable) option for homes everywhere.

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money?

Solar panels are often marketed as a way to save money on electricity – and

sometimes as a way to make money too.

Do solar panels save money?

Multiple solar panels connected together to form a solar array, also known as a PV system. Solar installers usually mount the solar array on your roof, but are also available. Homeowners do save money and help the environment when they use the sun's energy to power their homes. These aren't the only benefits of solar, though.
