Tesla Solar Roof vs. Solar Panels: What is Best for You?

Tesla Powerwall battery. Solar Roof systems use a mix of energy-producing and non-energy-producing roofing tiles - this means the total installation cost varies widely depending on the size and complexity of your roof. For example, as of 2022, a Tesla solar roof installation on a 1,500-square-foot roof is estimated to cost \$22,950* for

Costs for Solar Roof : r/TeslaSolar

I also had read that the solar roof price increases were a result of Tesla underestimating the labor costs associated with installing solar roof tiles, thereby prompting the price increases. I probably could have went 5 more years with the old asphalt roof. My 9.5 kW solar roof with 1 Powerwall was just under \$50k. Came out to about \$35k

114KWh ESS

Solar Roof

1 \$21.85 per square foot is the price of a Solar Roof derived using similar methodology, roof size, and energy costs described in Consumer Reports' research. This price does not reflect any solar incentives. The price was calculated for a roof where 35 percent of the tiles are solar (solar tiles cost more per square foot than non-solar tiles), in order to generate ...

SOLIX F3800 + Smart Home Power Kit + Roof panels = Plug in

There is a lot of good info in this anker article - but I'm 95% sure that the batteries will NOT charge from your solar if there is an extended power outage - It can charge from rooftop solar while connected to the grid - but that link is broken during a power outage - you can however charge from solar panels directly connected to the F3800 in a power outage but that would be limited ...
