Austria balancell energy

Overview

What is the current energy balance in Austria?

The data reached an all-time high of 82,505.751 TJ in 2019 and a record low of 16,282.000 TJ in 1972. Austria Energy Balance: Annual: Electricity: Exports data remains active status in CEIC and is reported by Statistics Austria.

How many TJ in Austria energy balance?

Austria Energy Balance: Annual: Electricity: Exports data was reported at 71,605.215 TJ in 2022. This records an increase from the previous number of 68,014.931 TJ for 2021. Austria Energy Balance: Annual: Electricity: Exports data is updated yearly, averaging 35,125.000 TJ from Dec 1970 to 2022, with 53 observations.

Where do energy balances come from?

Data entering the energy balances come from own surveys, from business statistics as well as from administrative data sources. Energy balances are published annually for each calendar year. A preliminary version at the national level is made available at the end of May.

When are energy balances published?

Energy balances are published annually for each calendar year. A preliminary version at the national level is made available at the end of May. The final data at the national and the federal province level become available in November. The chart has 1 Y axis displaying . Data ranges from 22529.3 to 345337.1. S: STATISTICS AUSTRIA, Energy balances.

What are energy balances?

Furthermore, energy balances show the consumption of energy for the most important economic sectors (e.g. industry, services). Around 80 different energy products (e.g. electricity, district heat) and energy product groups (e.g. renewables, gas) are covered.

How much energy does Austria produce a year?

Austria Energy Balance: Annual: Electricity: Exports data is updated yearly, averaging 35,125.000 TJ from Dec 1970 to 2022, with 53 observations. The data reached an all-time high of 82,505.751 TJ in 2019 and a record low of 16,282.000 TJ in 1972.
