### North Korea's Energy Sector: Civilian Solar Power

A typical installation of solar panels is simple: a solar panel on a roof or balcony is connected via regulator to a large battery. During the day, electricity from the solar panel trickle charges the battery. At night, the power from the battery can be harnessed to either directly power low-voltage devices or is fed through an inverter to

## Balcony Solar Energy System With Portable Power Supply

1. Solar Panels: The core component of a balcony solar system is solar panels, usually mounted on the top or sides of the balcony. These solar panels consist of numerous solar cells that convert sunlight into direct current (DC) electricity.
2. Inverter: The electricity generated by the solar panels is in the form of DC, while most household appliances use alternating current (AC).
