Overview

Who is acculon energy?

Developer of energy storage technology intended to create next-generation lithium systems. The company leverages AI and One of Acculon Energy's competitors is K2 Energy Solutions, a Venture Capital-Backed company based in Rexburg, ID.

Where are acculon energy storage systems made?

Our energy storage systems are a user experience designed for work, play, and importantly, for life. Manufactured in Ohio. With a scaled production capacity of 2GWh to begin mid-year, Acculon is positioned to power the electrification era with our multi-chemistry, AI-powered CORE battery system architecture and COTS battery products.

Who invested in acculon energy?

BRITE Energy Innovators and Terex have invested in Acculon Energy. Who are Acculon Energy's competitors?

K2 Energy Solutions is a competitor of Acculon Energy. Discover how our experts ensure you're getting the most accurate financial data in the industry.

What is acculon energy's primary industry?

Acculon Energy's primary industry is Energy Storage. Is Acculon Energy a private or public company?

Acculon Energy is a Private company. What is Acculon Energy's current revenue?

The current revenue for Acculon Energy is .

Who are acculon energy's competitors?

One of Acculon Energy's competitors is K2 Energy Solutions, a Venture Capital-Backed company based in Rexburg, ID. You're viewing 1 of 1 competitors. Get the full list » Explore institutional-grade private market research from our team of analysts. Ready to get started?

When was Acculon Energy founded?

Acculon Energy was founded in 2009.

What makes acculon unique?

With a scaled production capacity of 2GWh to begin mid-year, Acculon is positioned to power the electrification era with our multi-chemistry, AI-powered CORE battery system architecture and COTS battery products. Whether it is our modules, packs, or racks, everything at Acculon is designed, certified, and made in the USA. Expertise drives success.

Benin acculon energy

How Acculon's Data Platform Accelerates Battery Management ...

Developing a Battery Management System (BMS) requires the precise calibration of various system components to ensure performance and safety. While Acculon designs its BMS to be adaptable for different low-voltage battery systems, certain parts of the BMS must be fine-tuned to accommodate certain cells and components, depending on the ...

Careers

Careers Please check our company's LinkedIn page for current employment opportunities at Acculon. At Acculon, we believe in fostering a culture of innovation, collaboration, and personal growth. We provide a dynamic work environment that challenges and inspires our team members to reach their full potential. We encourage our employees to take ownership of their work [...]

 EASY TO TRANSPORT AND INSTALL,
 FLEXIBLE DEPLOYMENT

Acculon Energy & HiNa Battery Technology Strategic Partnership

Learn more about the new strategic partnership between Acculon Energy & HiNa Battery Technology. Contact: Betsy Barry
 Communication Manager 706.206.7271
 betsy.barry@acculonenergy . Acculon Energy and HiNa Battery Technology Company announce their strategic partnership. Click the link below to learn more:

Support Customized Product

The Latest Innovations Shaping the Battery Manufacturing ...

At the Battery Show 2024, we had the privilege of sitting down with Quanji Cai, a leading expert from Pia Automation, to discuss the latest innovations shaping the battery manufacturing industry. With a wealth of experience in automation solutions, Cai shared insights into the battery industry and how advanced automation technologies are driving safety, ...

Prototyping

Prototyping By outsourcing the prototyping phase of their battery module or pack development, our clients benefit from Acculon's expertise in translating design concepts and solutions into functional prototypes. Acculon leverages its resources, equipment, and experience to produce prototypes that closely represent the final battery module or pack. This collaborative ...

Celebrating Two Years of Innovation: An Interview with Acculon Energy...

As Acculon Energy approaches its second anniversary, we had the privilege of sitting down with Andrew Thomas, the president of our company. With a vision rooted in innovation and a commitment to excellence, Andrew has been instrumental in driving Acculon Energy's growth and success over the past two years. In this interview, Andrew shares his

Certifiable by Design:

Acculon's Process-Driven Approach to BMS

Acculon Energy's product development is process-driven and prioritizes safety. Our BMS is no exception. Our commitment to safety ensures that our BMS is reliable and adheres to the highest safety standards-safety standards that guide our design and development, every step of the way. ISO 13849 is a globally recognized standard that outlines the requirements for ...

Battery Program Customization for Battery System

At Acculon Energy, we have transformed the process of energy storage customization into a product development philosophy-a philosophy centered around the idea that battery systems should be designed for life, the life cycle of the system itself, and the lives of those who depend on commercial and industrial applications that we power for both

Investors

Acculon Energy's journey began in 2009 with the building of our first advanced battery testing lab in Columbus, OH. This boutique lab, CAR Technologies, became an instant hit with global automotive and battery OEMs alike, earning its place as one of the top-ranked battery testing and engineering suppliers in North America and the global go-to cell supplier qualification facility for

[Acculon Energy - Castle Placement](#)

In June 2022, CAR Technologies, a tier-one advanced battery lab founded in 2009, and Technicity LLC's battery prototyping and controls division combined to create Acculon Energy, Inc.. In August 2022, Terex Corp. led a Series A investment in Acculon Energy with a \$10 million investment, focusing on advanced battery programs of industrial and commercial OEMs.

The US Battery Industry: De-risking from China, Reviving U.S

These advanced technologies offer potential breakthroughs in energy density, safety, longevity, and in some cases, a more secure supply compared to traditional lithium-ion batteries, and represent an area where the US and companies like Acculon Energy are full steam ahead in research and development.

Building a Better BMS through Model-Based Systems Engineering

The most important aspect of choosing the right BMS begins with thoroughly understanding your

commercial or industrial application's requirements, making sure that the BMS is able to handle your specific voltage, current, & energy demands. At Acculon, we develop our BMS to meet the specific safety, performance, & application requirements for

Made in USA: American Battery Initiative , Acculon Energy

Here at Acculon Energy, we are committed to doing our part to bring advanced manufacturing back to US soil, while promoting optimized energy storage solutions to power a range of commercial and industrial markets. By fostering innovation, investment, and collaboration, we aim to do our part in securing a more sustainable and competitive

Exploring Sodium-Ion: A Promising Alternative Cell Chemistry

Here at Acculon Energy, we have been conducting our own research into Na-ion cells that are entering the market. The results so far are promising. On one of the high-energy Na-ion cell types, we are now about the 300th cycle of 0.5C rate cycling at room temperature with full depth of discharge and getting 96.3% of maximum capacity. Fig. 1.

Understanding Battery Aging Parameters , Acculon Energy

As we continue to push the boundaries of battery

technology, extending the lifespan of energy storage solutions will mean that batteries go from lasting a couple of years to lasting an entire generation. Through ongoing research, innovation, and collaboration, we can unlock the full potential of lithium-ion batteries while ensuring a

Testing

Testing Acculon clients benefit from our expertise in conducting comprehensive testing procedures, navigating certification requirements, and ensuring compliance with industry standards. Acculon's resources, experience, and ownership of unique battery testing facilities contribute to a streamlined and efficient process, resulting in reliable and compliant lithium ...

Acculon Joins Genie at The ARA Show 2024!

Acculon Energy is excited to announce its participation at the American Rental Association (ARA) Show 2024. The team will be making an appearance at booth #5339 alongside Genie, a global leader in mobile elevating work platforms (MEWPs), on February 19th and 20th.

From Global to Local: How domestic manufacturing and supply ...

Administered by the DOE's Office of Manufacturing and Energy Supply Chains, the projects are designed to establish and expand facilities for processing critical minerals,

manufacturing battery components, and recycling, which are crucial for enhancing U.S. energy security and supporting the clean energy transition, and which, importantly

Empowering Performance: Navigating the Dynamics of Power ...

This is essential for applications that require high power output, rapid charging, and efficient energy transfer, contributing to improved overall performance and responsiveness of the battery system. Both energy density and power density considerations are crucial for designing batteries that meet the diverse requirements of various applications.

"I'd like to speak to the manager!" Understanding the Primary ...

Lithium-ion (Li-ion) and Sodium-ion (Na-ion) energy storage systems offer significant advantages for today's high-demand commercial and industrial applications. you'll gain a deeper understanding of why a robust BMS is essential for today's high-demand applications and how Acculon approaches the development process to meet systems
