Techno-economic analysis of a utility-scale grid-tied solar

The cities in the northern parts of Benin have the highest solar energy potential. However, these cities have the lowest access rates to electricity (Oudou et al., 2020). In view of this, the government is now making an effort to increase access to sustainable energy, particularly solar energy capacity, through various solar projects in the country.

Solar Energy

Solar energy is radiant energy from the sun--a fully renewable energy resource. We use the solar resource to provide daylight, electricity, and heat in four ways (in order of prevalence): Indirect: Our primary use of the sun's energy is for free light and warmth (not counted in the data below but important for energy efficiency)

Benin: Access to reliable and affordable off-grid energy to be

Households, smallholders and entrepreneurs in remote locations across Benin will be able to access reliable and cheap electricity for the first time under a new off-grid solar scheme agreed between leading solar energy company ENGIE

Energy Access and the European Investment Bank, one of the world's largest financiers of renewable energy.
