Bermuda solar on grid system price

Overview

The cost of installing a kilowatt in Bermuda is around \$4,000 to \$6,000. A good solar photovoltaic panel can last between 25 to 40 years.

The cost of installing a kilowatt in Bermuda is around \$4,000 to \$6,000. A good solar photovoltaic panel can last between 25 to 40 years.

The electrical output of the solar system mostly depends on the installed capacity and the efficiency of the module used. The most commonly used types of solar modules are the Polycrystalline silicon and Monocrystalline silicon. The cost of installing a kilowatt in Bermuda is around \$4,000 to \$6,000.

According to BeSolar installation costs can range \$14,000 to \$48,000 and savings on electricity will “pay” for the system over a 6-9 year period – although this is a very general estimate with various factors influencing the costs and savings (more on that below).

BE Solar offers the best in solar electricity systems for Bermuda's harsh climate. We carry modular, completely integrated systems that are designed to expand with your growing needs or repair and replace over time.

The SPRI is available to residents of Bermuda who wish to install a solar photovoltaic generation system on a residential dwelling which they own provided that the ARV is \$120,000 or less. This rebate was launched on October 11th, 2018.
