barbados successfully secured the bid for a 4.6MWh Hybrid Battery Energy Storage System (BESS) project in Barbados. Initiated by the Barbados National Petroleum Corporation (NPC) and funded by institutions including the Inter-American Development Bank (IDB), this project marks a significant milestone.

The introduction of battery energy storage systems (BESS) facilities will greatly enhance the island's ability to integrate renewable energy into the grid, stabilise power supply, and reduce dependence on fossil fuels.

The Ministry of Energy and Business is currently hosting a three-day Procurement Design Workshop with key stakeholders to discuss and make critical decisions with regard to procuring Battery Energy Storage Systems (BESS). Barbados has reached the maximum capacity of the electric grid and the Barbados Light and Power Company has been advising .

The Fair Trading Commission (the Commission) and the Chief Electrical Officer have approved the Barbados Light & Power Company Limited's (BLPC's) Interconnection Requirements for Battery Energy Storage Systems (BESS) at Voltages 24.9 kV and below.

Battery energy storage grid connection , Green Frog Connect

"Battery energy storage is disrupting the energy market and will transform the operations of grids and power markets. Yet more change will come with the ability to store ever-increasing amounts of power, putting businesses in a strong - and independent - position."

Evolving BESS market in 2024: Safety, new tech, and long-duration

Along with advancements in safety, BESS will also see innovative developments in technology this year. The BESS industry has been dominated by lithium-ion batteries, but the need for more long-duration storage, which cannot currently be done economically and safely with lithium, will open the door for promising non-lithium technologies.

Sungrow and MSR-GE sign partnership agreement for BESS project

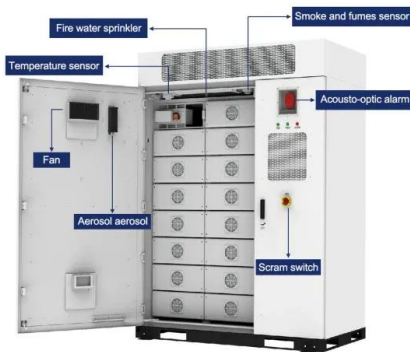

Xavier Qiang commented: "We are delighted to

collaborate with Sungrow, one of China's top BESS providers with a strong global track record. MSR-GE has successfully implemented an off-grid solar BESS hybrid system with Sungrow's solution to supply 24/7 clean energy to a palm oil plantation in Sabah. We look forward to merging MSR-GE's
