Bhutan svc power system

Improved Harmony Search Algorithm for Optimal Placement and ...

Static Var compensator (SVC) is normally used in power system to improve voltage profile and reduce system power losses. In this paper, a relatively new optimization technique named as the improved harmony search algorithm (IHS) is applied to determine optimal location and size of SVC devices in a transmission network. A multi-criterion objective function comprising of both ...

Supply Online UPS Lithium Battery 1000/2000/3000W

Product Overviews. The RT-Li series is the online UPS with lithium ion battery.. Designed with double-conversion topology, the battery backup provides sine wave output to mission-critical applications and equipment requiring seamless power correction. Besides, the lithium ion uninterruptible power supply deliver clean AC power with zero transfer time.

...

the best location of only one SVC within a power system in which the objective function is defined for reducing power loss, voltage deviation and cost. An AIS technique is used to minimize the total loss and improve the voltage in a power system [7] by determining the correct placement of SVC. The well known PSO is explored in [8] to obtain

Static voltage stability study on Bhutan interconnected power grid

The objective of this study is to enhance voltage stability and loadability based on static analysis. The proposed approach is based on the comparison of installing Shunt capacitor, SVC ...
