Using forscan to modify bms when upgrading to AGM

I upgraded my battery to a odyssey 96r AGM battery. I was reading a particular thread where there was an lithium battery upgrade and solving the charging issues using forscan to modify the bms settings. My question is. While using forscan and selecting AGM for battery type that'is closest to my battery specs, then do I change the maximum charge

AGM Batteries: Myths And Truths

Ford has the battery-monitoring system (BMS). Other manufacturers have similar systems. These systems require recalibration with a scan tool if the battery is replaced. If the system is not recalibrated, the alternator might overcharge the new battery and cause the battery to fail soon after replacement. An AGM battery will give the vehicle

[BMS for Lead Acid Batteries : r/SolarDIY](#)

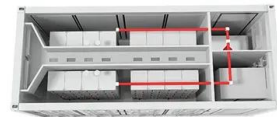

Lead acid batteries do not require a BMS. You will be fine without one. You may want to consider

using a busbar for them since it will allow more equalized charging for each battery. Keeping all the wires to each battery the same length will help also. Valve-regulated batteries, including most AGM don't really like equalization charges. But

Brushless PMAC Turnkey Systems

EFB and AGM differences , VARTA Automotive Batteries

Batteries with modern technologies such as EFB and AGM are monitored by a battery sensor and are closely linked with the battery management system (BMS). If a wrong battery is used, this can cause deficiencies in the automatic start-stop system, failures of comfort functions and reduced service life of the battery.

Pure lead AGM batteries with HOPPECKE HPPL technology

HPPL batteries also belong to the family of AGM batteries and therefore follow the basic structure with the difference that the electrode thicknesses used correspond to only a fraction (approx. $\frac{1}{4}$) of classic products. The potential of this technology derives in maximizing the number of electrodes used.

Ford BMS oddities with AGM battery , BobIsTheOilGuy

Today I replaced an old flooded battery with an agm in my 2016 Explorer. Same group size and very similar CCA as the flooded battery. I do have access to Forscan, but I've read on many Ford vehicles you can reset the BMS (battery

monitoring system) without it, and that applies to my vehicle as well.
