Intelligent Solar

A solar façade system converts sun radiation into electrical energy, and most façades can be used or adapted for solar installations. Energise your façade with architectural solar panels for building-integrated photovoltaic modules. With solar cladding, solar cells are integrated into the skin of buildings by the use of glass/glass laminate.

Intelligent Solar

To preserve the character of the brick façade, digital printing was used to print the brick design for the panels. The modules from Intelligent Solar were installed on a total area of 130 m² and now they generate approx. 8500 kWh of electric power. With the printed brick pattern they perfectly fit the aesthetic design of the building.
