Sobre CIC energigUNE; Misión y visión; Organización; Edificios e Instalaciones. Un conjunto de edificios modulares conectados que actúa como agente vertebrador de la actividad del centro; Patronato. Entidades públicas y privadas vascas apoyan las actividades del centro, contribuyendo a orientar la investigación de excelencia.

[High-performance solid-state batteries](#)

Researchers at CIC energigUNE have more than 10-year experience developing solid-state batteries and are closing the gap between research and development and cell production. The father of solid-state battery technology, Professor Michel Armand, is part of our research team, a mentor and an example that our young research team is imitating. The ...

How are batteries made in a

Gigafactory? , CIC ...

However, a large part of the future energy transition depends on the development and optimisation of these processes, as well as their proliferation through the famous gigafactories. That is why from CIC ...

We're excited to bring back our renowned maps showcasing #gigafactories in Europe and North America.?? ?These hubs of #innovation are driving the future of #energystorage and production!

Interactive chart of expected production capacity of

At CIC energigUNE we have developed the following interactive chart where you will find information on the production capacity in GWh of the main battery manufacturers. You can access

48V 100Ah

the information for each supplier by hovering your mouse over each section of ...

The battery industry's new strategy: Cross value

The reason for these moves is clear, especially with regard to the initial stages (such as material extraction or processing): to ensure the entire value chain and its deployment now that the industry is still in an incipient state and with some phases of activity "limited" (such as supply itself, due to the potential shortage of raw materials in the coming years).

Platforms and Facilities

The strength of CIC energiGUNE lies in having a set of characterization platforms and experts responsible for platforms with great recognition in Europe in each of their fields. Thanks to this, CIC energiGUNE is one of the few centers that can obtain a very precise analysis of that "black box" that for our scientific and business customers are

Challenges on battery manufacturing industry , CIC energigUNE

Last June, CIC energigUNE took part in the Young Scientist Event organized by Battery 2030+ initiative, where the main challenges for the development of the batteries of the future were discussed. In the last decades it has been identified that Electric Vehicle (EV) will play an important role towards the energy transition.

CIC energigUNE, the Basque research center of reference in battery storage, thermal energy solutions and hydrogen technologies, and member of the Basque Research & Technology Alliance-BRTA, will promote ...

How Europe aims to achieve battery independence from China

Another five gigafactories are planned by 2030, taking total capacity up to around 665 GWh. Adding in predicted capacities of projects without exact commissioning dates, Europe could have

an annual production capacity of lithium-ion cells in 2030 of around 785 GWh - in other words, more than the current global capacity.

North America accelerates its commitment to the

Canada picks up speed as Mexico continues to await projects. As can be seen, the USA is the leading player on the North American map of gigafactories. However, unlike a year ago, its neighbor Canada seems to have ...

North America takes a stand in the battle for electric

Such is its attraction that no one wants to keep behind, and given Asia's dominant position and Europe's ambitious plans, North America is looking to take matters into its own hands.. Particularly, the USA is the main player in the region and the one who is most worried about missing the boat. So far, this country has partially stood out in the race to lead ...
