

## Solar Energy South Africa

# Can foldable photovoltaic panels be used directly

## Overview

---

Unlike a solar panel that you might place on your roof, which is set in a fixed, rigid frame and sealed under glass, a typical portable panel is usually encased in a protective sleeve made of mesh fabric or plastic. Small, inexpensive (under \$50) panels will generate 5 to 50 watts, while larger ones can generate 300.

Because these panels are portable, they are often used by campers, travelers, or anyone who needs a supply of electricity when unable to access.

When shopping for portable solar panels, here's what to look for. Treehugger has reviewed some of the best of them.

A portable solar panel is certainly a cleaner source of electricity compared to most alternatives, but to make it worth the investment, consider its.
