Overview

Who is Canadian Solar?

Canadian Solar was one of the first companies to introduce PV cell and module technologies that later became the industry mainstream, such as bifacial modules (back in 2010), modules with larger-format wafers (up to 210 mm) and, nowadays, N-type high-efficiency cells and modules.

How many solar modules does Canadian Solar have?

By October 2022, Canadian Solar has shipped more than 80GW solar modules to customers in over 160 countries worldwide and owns a global portfolio of 25GW solar PV projects and 40GWh energy storage projects.

Does Solarity offer bifacial Topcon modules?

Currently, Solarity can provide the market with 565W bifacial Topcon modules as this power class is in the most demand on the market. Also, Solarity will soon secure a higher power class of Topcon modules for C&I projects, either in regular or bifacial types.
