

## Solar Energy South Africa

# Croatia volue energy

## Home Energy Storage (Stackble system)

High Efficiency

Easy installation

Safe and Reliable

Perfect  
Compatibility

### Product Introduction

-  Scalable from 10 kWh to 50 kWh
-  Self-Consumption Optimization
-  Integrated with inverter to avoid the compatibility problem

-  LFP battery, safest and long cycle life
-  Stackable design, effortless installation
-  Capable of High-Powered
-  Emergency- Backup and Off-Grid Function

## Overview

---

Energy in Croatia describes energy and electricity production, consumption and import in Croatia. As of 2023, Croatia imported about 54.54% of the total energy consumed annually: 78.34% of its oil demand, 74.48% of its gas and 100% of its coal needs. Croatia satisfies its electricity needs largely from hydro and thermal power plants, and partly from the Krško nuclear power p. Energy in Croatia describes energy and electricity production, consumption and import in Croatia. As of 2023, Croatia imported about 54.54% of the total energy consumed annually: 78.34% of its oil demand, 74.48% of its gas and 100% of its coal needs. Croatia satisfies its electricity needs largely from hydro and thermal power plants, and partly from the Krško nuclear power plant, which is co-owned by Croatian and Slovenian state-owned power companies. Renewable energies account for approximately 31.33% of Croatia's energy mix.

(HEP) is the national energy company charged with production, transmission and distribution of electricity. ProductionAt the end of 2022, the total available power of power plants on the territory of the Repu. (HEP) is the national energy company charged with production, transmission and distribution of electricity. ProductionAt the end of 2022, the total available power of power plants on the territory of the Republic of Croatia was 4,946.8 MW, of which 1,534.6 MW in thermal power plants, 2,203.4 MW in hydropower plants, 986.9 MW in wind power plants and 222.0 MW in solar power plants. For the needs of the electric power system of the Republic of Croatia, 348 MW from NPP Krško is also used (ie. 50% of the total available power of the power plant in accordance with the ownership shares). The total production of electricity in the Republic of Croatia in 2022 was 14,220.5 GWh, whereby 63.7 percent (9,064.9 GWh) was produced from renewable energy sources, including large hydropower plants. In this percentage, large hydropower plants participated with 38.4 percent (5,454.2 GWh), and 25.4 percent (3,610.8 GWh) of electricity was produced from other renewable sources (wind energy, small hydropower plants, biomass, geothermal energy, and photovoltaic systems). Domestic electricity production covered 75.2 percent (14,220.5 GWh) of electricity needs, which in 2022 amounted to 18,915.3 GWh. The import of electricity in 2022 amounted to 11,919.7 GWh, which is 63.0 percent of the total realized consumption. The export of electricity amounted to 7,224.9 GWh, which is 50.8 percent of the total domestic electricity prod.

• • • •

Croatia produced 133,230,439,000 BTU (0.13 quadrillion BTU) of energy, covering 38% of its annual energy consumption needs. How much energy does Croatia use?

According to Eurostat, gross primary energy consumption in Croatia in 2021 was 9.61 Terrawatt hours (TWh) and final energy consumption was 8.1 TWh. Renewable energies account for 31.33 % of Croatia's energy mix, with 53.47% of total electricity production coming from renewables, primarily large hydropower plants.

How can Croatia become energy-independent and sustainable?

In order to become energy-independent and sustainable, Croatia counts on its abundant renewable energy resources. In February 2020, the Croatian government adopted a new Energy Strategy for the period until 2030, with an outlook through 2050.

How much electricity does Croatia produce in 2022?

The total production of electricity in the Republic of Croatia in 2022 was 14,220.5 GWh, whereby 63.7 percent (9,064.9 GWh) was produced from renewable energy sources, including large hydropower plants.

How does Croatia get its electricity?

Croatia satisfies its electricity needs largely from hydro and thermal power plants, and partly from the Krško nuclear power plant, which is co-owned by Croatian and Slovenian state-owned power companies. Renewable energies account for approximately 31.33% of Croatia's energy mix.

What is Croatia's energy strategy?

In February 2020, the Croatian government adopted a new Energy Strategy for the period until 2030, with an outlook through 2050. The Strategy includes a wide range of energy policy initiatives that will improve energy security, increase energy efficiency, lower dependence on fossil fuels, increase local production and increase renewable resources.

What is Croatia's national energy strategy 2009-2020?

Croatia's National Energy Strategy 2009-2020 has three basic objectives: increase security of energy supply, develop competitive energy system and ensure sustainable energy sector development. These objectives are

particularly important for the count
