Residual Gas Analyzer

The RGA systems are supported with a real-time software package that runs on Windows OS computers. The intuitive graphical user interface allows measurements to be made quickly and easily. Data is captured and displayed in real-time or scheduled for acquisition at a given time interval for long-term data logging. Multiple spectral data and

HAL 101X RC , A Residual Gas Analyser for hard radiation ...

Hidden RGA series systems are designed for residual gas analysis, gas analysis and process

monitoring applications including leak detection, trend analysis and vacuum survey. The HAL 101 X RC is a specific analyser with additional features for real time quantitative analysis of complex gas and vapour mixtures in fusion applications and harsh

Gas Analysers , Residual Gas Analysis , Suppliers

A dual mode RGA system for vacuum diagnostics and process monitoring without differential pumping. Measures the residual gases, process contaminants and provides for leak detection. Find Out More. HAL 201 RC. A Residual Gas Analyser configured for demanding UHV applications. Measures the concentration of gases and vapours in real time.

RGA System , Molecular Beam , Studies , Analysis

Hidden's 3F Series 1000 RGA. mass spectrometers with pulse ion counting detection system and integral signal gating enable effective molecular beam analysis. Integral delay timers provide for automatic acquisition of foreground and background signal in ...

HMT , RGA System , Vacuum Diagnostics , Process Monitoring

A dual mode RGA system for vacuum diagnostics and process monitoring. The Hiden HMT quadrupole mass spectrometer is a unique dual mode RGA system capable of operating at pressures up to 5×10^{-3} mbar without the need for differential pumping. Operation at this pressure is achieved using a specially designed ion source/quadrupole filter combination and software ...
