Electrification rates are relatively high in Equatorial Guinea at 66%. The country began oil production in the late 1990s and began LNG exports in 2007. and in some countries is used to heat homes and buildings. In non-energy applications, coal can be used to produce the industrial chemicals needed to make plastics and fertilizers.

Who Pressed Pause? How Stalled Negotiations Can Keep Equatorial Guinea

Will Equatorial Guinea fulfil its promise as a gas

"mega hub," or will stalled negotiations turn what should be a national economic boon into a missed opportunity? The answer depends largely on how quickly the country can nail down gas supply agreements from Nigeria and Cameroon. Right now, things don't seem to be moving nearly fast enough. Will ...
