

**Solar Energy South Africa**

# **District Photovoltaic Bracket Fixture Company**

## Overview

---

What are solar panel brackets made of?

**Marine-Grade Materials Ready for the elements** Our solar panel brackets are made of a T66 graded alloy, which we use for its incredible reliability, versatility and high strength-to-weight ratio. T66 is used in shipbuilding and offshore industry, so you will never have to worry about weather or the elements.

Which rail fixtures should I choose for my solar panel installation?

Rail fixtures will be tailored to the exact requirements of your installation. These heavy-duty anodised aluminium rails and connectors are specially treated for maximum durability and are placed at the edges of your solar panel mounting brackets to fix them to the roof. Black Anodised Aluminium Mid & End Clamps.

How many production bases does solar power company have?

The company operates three major production bases, encompassing nearly 50,000 square meters of production area. Its main business includes various photovoltaic fixed ground mounting structure, distributed mounting structure, tracking photovoltaic mounting structure, building mounting structure, and distributed power station development, etc.

Why should I choose a T66 grading solar panel bracket?

**Key features** Reliable, strong and durable Our solar panel brackets were designed in the UK Barely visible on your roof T66 grading means they are certified for offshore use Black Anodised Aluminium Rail & Rail Connector Rail fixtures will be tailored to the exact requirements of your installation.

Can versol mount a photovoltaic power station?

Versol's V-Basic mounting system can be applied to photovoltaic power station in different terrain and environment. The product range includes a wide range

of models and styles, and is highly adaptable.
