### [Operation & Installation Manual](#)

A grid current sensor (supplied) simply clips around the incoming supply cable and is used to monitor excess power. When using the special ECO charge modes, zappi will automatically adjust the charge rate in response to available

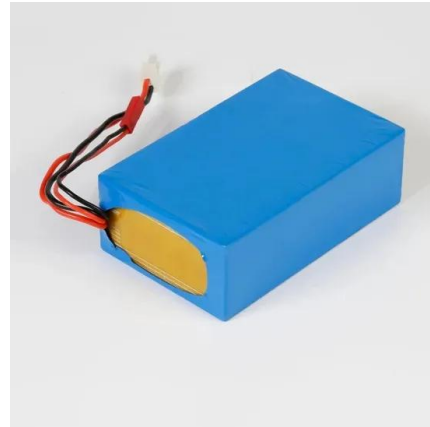

### Zappi V2 and More Exciting News from the myenergi HQ

The project will be running over the next couple of years and we will be recruiting some existing zappi and eddi owners to get actively involved and help us gather data. Hopefully, in the next month, we will be contacting possible candidates. Investing in People. myenergi are proud to recruit locally from their beautiful Lincolnshire surroundings.

## My Zappi

The skill is called My Zappi and you can find it in the Alexa skill store. I copied the serial number of my Zappi from my Myenergi Product screen and pasted it to the Amazon screen followed by the API Key. The Amazon screen would not accept what I had just copied over, so I generated another API key and tried again.

## zappi v2

additional support for 3 phase systems, allowing connection of a single phase zappi in a 3-phase 3-wire supply, and to allow the ECO+ mode to be used on a three-phase zappi with all three phases energised. The way i read it, this allows the Zappi 1 to be able to be used with 3-phases, which is not possible. Richard

## Zappi not charging at 7kw

5 ???· The Zappi uses the PWM to indicate to the car how much charge is available and the car decides how much of that charge to use. For a single phase Zappi maximum charge is around 32 amps / 7.2 kW and a PWM of 53% indicates that is available. If the PWM is less than that, then the Zappi is limiting charge.

## Einstellung Zappi

Einstellung Zappi. steffene. 6 2. steffene. 6 2. In der Myenergi App zeigt sich das aber ganz anders. Da gehen dann nur 0,5 kw der angeblich 1kw produzierten ins Netz. Ich habe 3CTs mit Harvi an der Netzmessung, 3CTs mit Harvi am Wechselrichter und 1CT mit Harvi an der Batterie, da diese nur 1phasig läuft.

[Intellegent Octopus and Zappi](#)

Hi I wondered if you are working with Octopus energy to enable the Intellegent octpus service to work with Zappi chargers. I am guessing they are working on only allowing the car to charge in off peak time, and so need additional information to make this happening.

[myenergi-MyEnergi API](#)

Example say the Zappi delivered 100w-sec for 6-hours then there would be 21600 records (6x3600) and one field will be Zappi power, so add them all up 100watt-sec x 21600=2160000/3600/1000 kWh = 0.6kWh That's just an example for the principle.

[Newbie help with Zappi please!](#)

You should try to get the Zappi v2.1 with Lan/wlan. then the HUB is integrated in the Zappi and you only have to bring the lan with a powerline adapter to the zappi. The only challenge that remains is the Harvi for the ct. This is necessary for the timers! the Harvi is still connected to the zappi at 868mHz. See also here: Communications-Principles

## [Reset password on Zappi](#)

Hi, I had a Zappi installed some weeks ago (ahead of the EV arriving). However - I stupidly set a password on the charger - but now cannot remember it Whilst these forums are lightly supported by MyEnergi staff, it seems to be just on a voluntary ad hoc (and frequently out of hours!) basis. For specific customer support such as this you

## [Zappi charging rate](#)

This remains the same if we charge in the middle of the day. We put our neighbours EV onto the zappi and the charging rate is still 3.6 kWh. The car is capable of being able to charge at 7.7 kW. We have searched for information but can't find out how to see if the zappi is set to charge at 7.7 kilowatt hours or lower? any advice gratefully

[extending charger cable for Zappi](#)

Myenergi do allow customers to purchase the optional 8M lead that the V1 came with, if you do wish to do that please speak with our sales team. If you have a V2 Zappi the only way you can get a longer cable and keep the warranty is to have a untethered unit and then you can have as long as you want for a cable.

[Can't unlock cable from Zappi 2](#)

I find this an irritating 'feature' of the Untethered Zappi, if I terminate a charge in any way this happens, it's no good following the screen instruction to press the + to unlock the cable as it doesn't work. I press the menu then reset the Zappi to release the cable. It's never been any different! I just accept it.

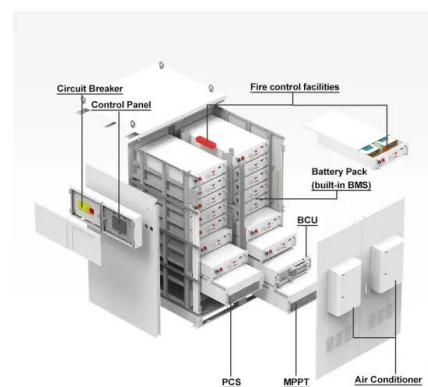

[Zappi v1 firmware update](#)

A couple of days ago I updated my Zappi v1 but I encounter several problems. This is the first picture I'd like to start with. Maybe this is not related to the update, but this is the 3th time since the update this is on the display and of course, Zappi and Harvi are red on the Hub.

**Electric Car Charger , zappi #1  
EV Charger ? myenergi Ireland**

Zappi versions that do not have the -T suffix comply with EN 61851-1:2019 with the exception of Clause 8.4 in order to meet the requirements of BS 7671:2018 Amendment 1:2020 which requires the protective earth conductor to be switched in order to provide protection against a damaged PEN conductor in a TN-C-S earthed electrical system

## Product Update , Introducing zappi 2.1 Multiphase , myenergi GB

4 ???· Originally, we offered eight zappi variants: four 7kW single-phase units, available with either tethered or untethered cables in black or white, and four 22kW three-phase models, also available in both cable types and colours.

## EV Charger , Low Cost Home Electric Car Charging

zappi provides you with tailor-made charging to suit your lifestyle and demands. Whether you need a "fast" charge to get you going in a hurry or are happy to wait for your charge to take place using 100% renewable energy, Zappi gives you the flexibility to charge on your terms.
