BattRAK LTO Carrier for Solar Charger and RAK Base Board

A practical minimum enclosure size is 100x120x36mm. The front and back parts slide onto the carrier and are secured in place with (4) M2.5x4 or M2.5x6 screws. Use (4) M2.5x4 screws to secure the RAK. Use (4) M2.5x8 screws to secure the MCSBC-SVR. The carrier mounting holes are centered at 60x40mm and should fit most off-the-shelf enclosure plates.

3 watt solar base station node (update) : r/meshtastic

Those are for holding the enclosure to the solar panel. In early iterations I made a design change that made it impossible to get a wrench under the enclosure to hold the nuts. The carriages slide under the lip of the panel, underneath each hole. Then you can screw down the enclosure without needing a wrench to hold the nuts.
