Eastern solar Christmas Island

Overview

Did Easter Island have a solar eclipse?

This annular solar eclipse was fully visible in Easter Island. Observers there could experience the “ring of fire” that is characteristic for this kind of solar eclipse. This was a rare and spectacular event that could only be experienced along a relatively narrow strip on the Earth's surface.

What is an annular solar eclipse from Easter Island?

The annular solar eclipse from Easter Island on Oct. 2, 2024. On Wednesday, Oct. 2, 2024, the sun was eclipsed by the moon for up to 7 minutes 25 seconds as seen from the South Pacific Ocean, southern South America and the South Atlantic Ocean. In an annular solar eclipse, the moon partially blocks the sun's center.

Where can I see a solar eclipse?

This "ring of fire" will also be visible above southern Chile and Argentina, but I've had the great privilege of visiting both of those countries already, for total solar eclipses in recent years. You can follow the eclipse on Space.com's solar eclipse live blog and watch the action unfold via numerous livestreams.

Where is the ring of fire on Easter Island?

Only Easter Island and a small area near the southern tip of Chile and Argentina witnessed an annular eclipse, lasting just a few minutes. "The ring of fire is a once-in-a-lifetime experience," Rocio Garcia, a tourist on Easter Island told Reuters on Tuesday. "Especially here in Rapa Nui with the Moai in the background it will be spectacular."

Where will a solar eclipse take place?

The path slides just to the north of the Falkland Islands and will leave the Earth's surface north of the South Georgia and South Sandwich Islands. A partial solar eclipse will be visible at sunrise from the Hawaiian Islands, and during the afternoon hours over the southern two-thirds of South America.
