

## Solar Energy South Africa

# Ecuador afripower solar

## Overview

---

Is there a potential for electricity generation in Ecuador?

Based on what has been described, it is identified that there is a high potential for electricity generation in Ecuador, especially the types of projects and specific places to start them up by the central state and radicalize the energy transition.

How much energy does Ecuador produce in 2022?

In 2022, Ecuador's generation capacity was 8,864 MW, of which 5,425 MW (61 percent) corresponded to renewable energy and 3,438 MW (39 percent) to non-renewable energy sources (fossil fuels derived from oil and natural gas).

What is the contribution of hydroelectric power in Ecuador?

This becomes an important strategic component within the Ecuadorian electricity production system. However, analyzed source by source, the greatest contribution is hydroelectric with 5064.16 MW of effective power of the total of 5254.95 MW, which implies 96.36% of the total renewable energy.

Does Ecuador have an electricity market?

In this research, an analysis of the electricity market in Ecuador is carried out, a portfolio of projects by source is presented, which are structured in maps with a view to an energy transition according to the official data provided.

Will Ecuador have a power shortage in 2023?

Ecuador is experiencing power generation shortages in 2023, and analysts expect them to extend to 2024. The Energy Ministry and CELEC plan to issue tenders to add additional generation. Future projects under consideration include hydro, geothermal, wind, and biomass.

How much wind energy does Ecuador have?

4.2.3. Wind energy According to the wind atlas of Ecuador [36, 39], in the useable areas, the average annual wind speeds exceed 7 m/s at 3000 m above sea level, indicating a feasible potential of 891 MW in the short term, which would be added to the 21.15 MW of power in service (16.5 MW on the mainland, and 4.65 MW on the insular region).
