energy is evident in upcoming projects, reinforcing its role in the global shift towards a greener energy sector. «Ninety-five percent of the electrical generation projects set to go into production and operation in 2024 will be renewable. This

(Español) Energía Solar En El Salvador

In the central region of El Salvador solar irradiation is high (5.3 kWh / m² / day) compared to other locations such as Germany or Tokyo (3.3 kWh / m² / day). The solar irradiation map in El Salvador was created under the SWERA project, which shows the solar irradiation potential in a one year ... Continue reading Solar El Salvador ->

Government to Install Energy Storage Systems at Substations.

The president of El Salvador's transmission company Etesal, Edwin Núñez, announced plans to install energy storage systems at substations managed by the company. This initiative, mandated by President Nayib Bukele, aims to address energy fluctuations, particularly in solar power, which can destabilize the distribution network.
