

Solar Energy South Africa

El Salvador libbi battery

Overview

Is Libbi a smart home battery storage system?

libbi isn't just a home battery storage system, it's eco smart. This means it makes intelligent decisions about when it provides and stores electricity based on how much energy you use, how much you generate with your solar and the electricity tariff you use. Libbi is smart. libbi seamlessly connects to your existing myenergi devices.

How many batteries can a Libbi system store?

The libbi system is modular by design. With this, you can create a home battery storage system between 5kWh (1 battery), up to 20kWh (4 batteries). How do I work out what system size I need to optimise my solar?

The size of the libbi system best suited for your home will be worked out by one of our certified installation partners.

Does Libbi work with solar PV?

A home battery storage system to suit your needs. libbi works as both an AC and DC coupled battery system with solar PV. Connect PV without the need for a separate inverter or retrofit to any existing AC system. Connect your new solar array directly to your battery, with no additional inverter needed!.

What is a Libbi solar inverter?

After years of installing their successful EV Charger (Zappi) and Solar Power Diverter (Eddi) they have added another product to their stable. The Libbi is a Hybrid Inverter with modular battery storage. Capable of being used for new installs, replacements for existing inverters, or retrofit to fit alongside existing solar pv systems.

What is the capacity of Libbi battery pack?

Robust Specifications With a nominal capacity of 5.12kWh, the Libbi battery

pack delivers reliable performance for your energy storage needs. It operates within a wide voltage range and can handle maximum charge/discharge currents of 50A/80A, ensuring efficient energy transfer.

How do Libbi batteries work?

As an installer, the Libbi gets a big thumbs up. Modular batteries allow much easier installations than huge 10kWh batteries. The instructions are clear and do not require a degree to decipher. The system builds from the ground up, so battery number 1 is installed, then the subsequent battery, and then the inverter on-top.
