Electricity prices in Portugal below EU average

According to the Electricity Price Comparison Bulletin, released by the Energy Services Regulatory Authority (), based on data from the European Union Statistics Office (), Spain presented, during the first six months of the

year, average prices of electricity 5% and 13% above Portuguese prices, for the domestic segment and for the non-domestic segment, ...

[Facts and fables about solar panels](#)

By the way, not having the grid as a back-up makes it wise to also invest in a power-generator, in case the batteries go flat. And they easily may when a few dark days follow in a row. All in all, going fully off-grid is a necessary option for those who cannot get a grid connection in the first place, or perhaps a comforting idea for people who

Uncovering the Hidden Gem of Lisbon: The Electricity Factory

The Electricity Factory, also known as the Central Tejo, is a striking reminder of Portugal's industrial revolution and the nation's journey into modernity. Built in the early 20th century, this decommissioned power station once supplied electricity to Lisbon and played a crucial role in the city's urban and industrial development.
