

## Solar Energy South Africa

# Energy Solar Power Generation Policy

## Overview

---

Planning guidance for developers of nationally significant renewable energy infrastructure projects.

How many GW of solar photovoltaic will be delivered by 2025?

It aims to deliver over 320 GW of solar photovoltaic by 2025 and almost 600 GW by 2030. Alongside the plan, the Commission also presented a set of initiatives on permitting processes for renewable energy projects, which are reflected in the revised Renewable Energy Directive (EU/2023/2413).

How does policy support affect solar PV deployment?

Policy support remains a principal driver of solar PV deployment in the majority of the world. Various types of policy are behind the capacity growth, including auctions, feed-in tariffs, net-metering and contracts for difference.

Can solar power help decarbonise the UK energy sector?

Co-written by Matthew Fox and Toby Yeates of Pinsent Masons. The central role envisaged for solar power generation in supporting the decarbonisation of the UK energy sector is reflected in a draft revised planning policy designed to shape decision making on major renewable energy projects.

Is solar energy a future energy resource?

The utilization of renewable energy as a future energy resource is drawing significant attention worldwide. The contribution of solar energy (including concentrating solar power (CSP) and solar photovoltaic (PV) power) to global electricity production, as one form of renewable energy sources, is generally still low, at 3.6%.

What is the contribution of solar energy to global electricity production?

While the contribution of solar energy to global electricity production remains generally low at 3.6%, it has firmly established itself among other renewable energy technologies, comprising nearly 31% of the total installed renewable energy capacity in 2022 (IRENA, 2023).

What is the IEA photovoltaic power systems technology collaboration programme?

The IEA Photovoltaic Power Systems Technology Collaboration Programme, which advocates for solar PV energy as a cornerstone of the transition to sustainable energy systems. It conducts various collaborative projects relevant to solar PV technologies and systems to reduce costs, analyse barriers and raise awareness of PV electricity's potential.

## Energy Solar Power Generation Policy
