The current energy system contributes to many environmental problems, including global warming, the consequences of which have already been felt for several decades. Discover the latest information on the management of the electric battery value chain in the Democratic Republic of Congo. On 17 July 2024, the Minister for Industry, SMEs and

DR Congo Goes With Solar Off Grid To Power 3 Northern Cities

Africa's second largest country, and one of its poorest, the Democratic Republic of Congo (not to be confused with the neighboring Republic of Congo) has finally placed a big bet on renewable energy. The government there has finally gone for a \$100 million investment off grid hybrid solar projects that will provide power to three cities [...]

DR Congo: Contractor sought for Lungudi hydro , African Energy

The Project Coordination and Management Unit (UCM) of the Ministry of Water Resources and Electricity invites bids by 17 July for the extension of the Lungudi hydropower plant in Tshikapa in the south- western province of Kasai. The Lungudi 2 project is be financed by the African Development Bank group as part of the Governance Improvement and Access to ...

About - TexPower

State-of-the-art high-energy battery cathodes use significant amounts of cobalt, a vital component only found a few places on Earth. Cobalt concentration in the DR Congo results in a centralized supply chain that facilitates monopolization. Additionally, significant social and environmental costs have supported this vulnerable supply chain that
