Where can I find information on energy access in Ivory Coast?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Ivory Coast on the IEA homepage. Find relevant information for Ivory Coast on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

How much energy does Ivory Coast produce?

Energy in Ivory Coast has a capacity of 2,200 megawatts (MW) energy production. Unlike other countries in sub-Saharan Africa, the Ivory Coast reliable power supply in the region, exporting electricity to neighboring Ghana, Burkina Faso, Benin, Togo, and Mali.

Does Ivory Coast have a reliable power supply?

Unlike other countries in sub-Saharan Africa, the Ivory Coast reliable power supply in the region, exporting electricity to neighboring Ghana, Burkina Faso, Benin, Togo, and Mali. Ivory Coast aims to produce enough renewable energy by 2030 to reduce its greenhouse gas emissions by 28%.

Does Ivory Coast engage with private energy companies?

Ivory Coast's engagement with private energy companies is not unique to the region. In fact, public-private partnerships are common across West Africa as they are equally popular with governments and private companies.

Will Ivory Coast achieve universal energy access by 2025?

With the 2030 Energy Plan identifying 66 projects that will require private investment, the door is open for new private partners to stake their claim. Ivory Coast aims to achieve universal energy access by 2025 and triple its generation capacity by 2030.

Will Ivory Coast achieve 400 MW solar power by 2030?

Ivory Coast aims to produce enough renewable energy by 2030 to reduce its greenhouse gas emissions by 28%. Ivory Coast aims to reach 400 MW in generating capacity from solar power by 2030. The country is building the Boundiali Solar Power Station, which will have a capacity of 37.5 megawatt-peak (MWp).
