About Berlin Energy About Berlin Energy. We are Leading the way in driving electric mobility towards a more environmentally sustainable future. Our cutting-edge energy storage solutions place us at the forefront of innovation in the field. Come join us as we pave the path towards a brighter and more eco-friendly tomorrow.

Saudi Arabia begins qualification for 8GWh battery storage tender

SPPC is soliciting bids for the development of four battery energy storage system (BESS) projects, each with 500MW output and 2,000MWh storage capacity. Storage Services contracts with 15-year terms will be awarded on a build-own-operate (BOO) model, with bidders holding 100% equity in special purpose vehicle (SPV) companies set up for the

Green hydrogen (GH₂) is produced using renewable energy resources (RERs) such as solar photovoltaic (PV) and wind energy. However, relying solely on a single source, H₂ production systems may encounter challenges due to the intermittent nature, time-of-day variability, and seasonal changes associated with these energies. This paper addresses ...

Electrochemical energy storage

In the coming years, the demand for batteries will increase drastically - through electric mobility, portable electronic devices or decentralised energy storage. Researchers at HZB are developing battery systems such as lithium-ion batteries, but are also researching new concepts that are not yet ready for application.

Energy Storage Inspection 2024: The winners are BYD

As part of the 2024 Energy Storage Inspection, HTW Berlin researchers analyzed the laboratory measurements from 20 lithium battery systems.

With a battery efficiency of 97.8 %, the pulse neo 6 home storage system from Varta came out on top. In comparison, one of the tested battery storage systems only achieved an efficiency of 87.9 % - almost
