The gateway to my Enphase system failed. The Solar company who installed it visited & replaced it with a new one. They took away a battery (one of four) as it had failed also. Now on 5/12/23 & after numerous calls to Enphase, the battery has still not been collected by Enphase courier for return to Enphase & either repair or replace

Enlighten App shows more production than local electric company ...

Solar Panel Newbie here I'm trying to understand how much electric I'm producing Vs consuming and I'm noticing a huge difference in numbers between the enlighten app and my bill. For example my last billing period states that I delivered 464 Kwh back to the power company. When I put the same dates into the Enlighten app it informs me that I produced 1.3 Mwh.
