Overview

Will lithium-ion batteries remain the mainstream technology in the ESS market?

InfoLink believes that the lithium-ion battery will remain the mainstream technology in the ESS market in the near future, especially with the recent price decline of lithium salts. As for LFP and NCA/NCM batteries, they each have their advantages and are not entirely in competition.

What percentage of Chinese electrochemical ESS market is lithium-ion battery?

April 25, 2023 As of the end of 2022, lithium-ion battery accounts for 90% of the Chinese electrochemical ESS market, light years ahead of other secondary batteries.

What are the most popular ESS batteries?

The following paragraphs compare the performance and commercialization of three of the most popular ESS batteries: lithium-ion batteries, Pb-acid batteries, and flow batteries to explain the dominance of lithium-ion batteries. Battery performance Table 1: Performance comparison of secondary batteries.

Will ESS based on NCA/NCM battery achieve lower LCoS?

InfoLink expects ESS based on NCA/NCM battery to achieve lower LCOS than that based on LFP battery, provided that NCA/NCM battery make technological breakthroughs in the future. However, due to their different characteristics, the application of the two will only be more diverged in the future.
