How does Pillars of Eternity 1/2 run on the deck? : r/SteamDeck

Personally I was happy with that because I value battery life and low fan noise highly, but if low or unstable framerates bother you, I'd wager you could raise or completely uncap TDP and get mostly stable 30FPS throughout the game (I won't say entirely stable, since the game is not well optimized) - but at potentially much worse battery life

Quest 3 Battery life is an issue : r/OculusQuest

I can highly recommend is. Battery drain of q3 is not "0" with it, but after round about 2 hours and an empty m2 battery, the hmds battery power is est. 80%. Next m2 battery, another 2 hours and so on. The price/performance ratio is much better than the original battery strap. Furthermore i really like those halo straps - it is

really comfortable.
