Investment Opportunities in the Ethiopian Energy Sector

annual growth rate of 9.5%.¹ As such, Ethiopia requires sustain-able, reliable, and affordable energy production to power the needs of the population, businesses, and industries. Energy, therefore, has become a strategic priority, and the country aspires to reach 100% electrification in 2030 through a blend of on- and off-grid energy solutions.

Ethiopia Plans Full Electrification by 2025

Water, Irrigation and Energy Ministry said it plans to fully electrify the country by 2025, a big leap from the current less than 45 percent electricity coverage that leaves more than 60 million in the dark. The ministry held today a consultative meeting on the Power Sector Reform Roadmap with key stakeholders. Water, Irrigation and Energy Minister,

Energy and economic growth in Ethiopia research findings for a

solutions alongside private-sector renewable energy investments for which simplified procedures, easier access to information and clarity on repatriation of funds for foreign investors are needed. Productive uses of energy, particularly for irrigation, can be a key enabler for improved agriculture output, resilience,

Advancing clean energy access in rural Ethiopia

Ethiopia possesses significant potential for generating renewable energy. Nevertheless, it remains one of the world's lowest energy consumers. The Ethiopian National Electrification Programme (NEP 2.0) estimates that about 56 per cent of the population lacks reliable electricity, with 35 per cent needing off-grid solutions.
