Finland solar panels for houses price

Overview

The average price for a high-quality solar electricity system is 7,000–10,000 euros and it is eligible for household deduction. If the system produces surplus electricity, you can sell it.

The average price for a high-quality solar electricity system is 7,000–10,000 euros and it is eligible for household deduction. If the system produces surplus electricity, you can sell it.

The price of one solar panel varies depending on the type, power and manufacturer. Prices can vary from around 100–300 euros per panel. However, this does not include other costs such as the inverter, installation or possible support structures.

We deliver and install solar panels in most regions of Finland. At present, the excluded regions are Lapland and Åland. We make it easy for you to take advantage of solar panels, and we ensure that your solar panels start producing electricity as expected.

Get solar panels for your roof easily. Request a quote via our website. Our experts carry out the mapping, planning and measurements related to the purchase of solar panels for your home. You may need a building or planning permit to install solar panels. We install the solar panels in one working day. You will receive guidance on using the system.

Typically, expect a range of €100–€300 per panel. Remember, this is just the panel cost, not the entire system. Inverter: This converts the direct current (DC) electricity produced by the panels into usable alternating current (AC) for your home. Inverter prices can range from €500 to €2,000 depending on the system size.

Finland solar panels for houses price

Solar energy still too expensive for Finnish homes

o In Finland the use of solar power is more common at the summer cottage than at home. 50,000-60,000 cottages use solar power. o A summer cottage system usually has 50-150 watt solar panels, and they cost 1,000-2,000 euros.
