

Solar Energy South Africa

Fvb energy Niger

Overview

Who is FVB energy?

FVB Energy Inc. is an integrated, global engineering firm that has been at the forefront of district energy innovation since our offices opened in 1980. We bring a +40-year depth of experience to client projects from around the world. A client-centric, proven partner delivering technology-agnostic solutions that solve our client's needs.

Who is FVB district energy?

Underlying our unprecedented knowledge of the North American district energy market is over 53 years of international DE experience. FVB District Energy UK Ltd was established in 2016. Our London office collaborates with local consultants and specialists and consultants from the wider FVB team in Sweden and North America.

What does FVB do?

FVB provides complete business and technical guidance for energy system development, from idea through design, financing, construction, commissioning and operations. Exponential Energy solutions is FVB's commitment to our clients around the world.

What makes FVB unique?

FVB continuously strengthening our knowledge base through the work we undertake and our engineering expertise is firmly rooted in the real world; moving beyond feasibility studies and conceptual designs. FVB is continuously involved in research projects for the development of new technologies.

Fvb energy Niger

University of British Columbia STHW Conversion - FVB Energy

Annual Energy 416,281 MMBtu; Contributing to UBC's Climate Action Plan with a state-of-the-art facility. FVB completed two detailed feasibility studies (in 2011 and 2012) for conversion of the University of British Columbia (UBC) District Energy System (DES) from steam to medium-temperature hot water.

Services - FVB Energy
