Georgia power storage inverter

Overview

Does Georgia Power have a new battery energy storage system?

ATLANTA, Aug. 29, 2024 / PRNewswire / -- Georgia Power has identified locations for 500 MW of new battery energy storage systems (BESS) authorized by the Georgia Public Service Commission (PSC) earlier this year as part of the company's 2023 Integrated Resource Plan (IRP) Update.

How many battery energy storage sites will Georgia Power have in 2026?

Georgia Power has applied for certification of four battery energy storage sites totaling 500 MW expected to come online in 2026.

What type of energy does Georgia Power use?

Committed to delivering clean, safe, reliable and affordable energy, Georgia Power maintains a diverse, innovative generation mix that includes nuclear, coal and natural gas, as well as renewables such as solar, hydroelectric and wind.

What do we know about Georgia Power Projects?

Georgia Power included attachments with information and data on each of the proposed projects, but since they contained "sensitive terms and conditions" and cost information, they were nearly entirely redacted from public disclosure- deemed "trade secrets." Here's what we do know about those projects:.

Will Georgia Power be able to build Bess?

In April, Georgia Power received permission from the Public Service Commission to forgo the typical bidding process and get right to constructing BESS to support its needs. In that filing, Georgia Power signaled its intention to solicit bids for more storage- another 500 MW- in the near future.

Where are battery energy storage projects popping up?

Battery energy storage projects are popping up all over the U.S., which added nearly 4 GW of storage capacity in the second quarter of this year alone, according to a recent report. Most of the new batteries- 97% of them- ended up in ERCOT, WECC, and CAISO territories.
