

Solar Energy South Africa

Ghana energy energy

Overview

Ghana generates electric power from hydropower, fossil-fuel (thermal energy), and renewable energy sources such as wind and solar energy.

Ghana generates electric power from hydropower, fossil-fuel (thermal energy), and renewable energy sources such as wind and solar energy.

Ghana aims to achieve a 10% renewable energy mix by 2030, leveraging solar, wind, and hydroelectric potentials. What type of energy does Ghana use?

Ghana primarily uses natural gas for thermal power generation, but occasionally uses light crude oil and diesel. Ghana exports power to Togo, Benin, and Burkina Faso. The Government of Ghana remains heavily involved in the energy sector, with state entities having a controlling presence in the entire value chain.

Where does Ghana get its power from?

Ghana's power supply sources are from hydroelectricity, thermal fueled by crude oil, natural gas and diesel, solar and also imports from La Cote D'Ivoire. Ghana also exports power to Togo, Benin and Burkina Faso. Ongoing grid expansions would allow further exports to other neighboring countries in the sub region.

How much energy is needed in Ghana?

Around \$70 billion of cumulative energy supply investment is needed in the STEPS, 60% of which is for upstream oil and gas. Investment ramps up by nearly 45% in the AC, with a strong emphasis on renewables and electricity networks. Thanks to notable efforts on electrification, the goal of full access is within grasp in Ghana.

What is the Energy Outlook for Ghana?

ate in the country. The 2024 Annual Energy Outlook is to give government, industry and business, indications of the levels/quantities of electricity, liquid

and gaseous fuels that would be required to be provided by the energy producers for this year. The Energy Outlook for Ghana outlines projections for energy demand and supply.

Why is the energy sector a problem for Ghana?

Long delays in payments by the government are a significant concern in Ghana's energy sector, as the subsidy comes from the national budget. Debt within the energy sector and the high cost of power in Ghana create a brake on Ghana's economic development.

What is the national energy policy of Ghana?

XVII Art. Cabinet at its forty-seventh meeting on 25th March, 2023 approved the reviewed National Energy Policy of Ghana which is intended to guide the development and management of Ghana's energy sector, especially during this era of the global call to transition to clean energy use.
