Glazed tile roof with photovoltaic panels

Overview

Solar roof tiles, also known as solar slates or solar shingles, are made to look a lot like normal roof tiles, except they also contain photovoltaic (PV) cells and can generate electricity. Are solar roof tiles a good alternative to solar panels?

Solar roof tiles, also known as solar shingles or solar slates, are a relatively new green energy technology. For those committed to sustainable energy generation and wanting to have a solar-powered home, solar roof tiles are worth considering as an alternative to solar panels.

What are solar roof tiles?

Solar roof tiles are slightly different to other types of solar technology as they blend seamlessly with your roof while providing your home with green electricity. This makes them the perfect match for people who want to benefit from cheaper energy bills and renewable energy, but don't like the look of solar panels.

Can glass tile solar panels be installed on a roof?

Tempered glass tile solar panels can be as durable as standard roofs, making them feasible for many roofs. While regular solar panels are bolted onto a roof, solar power roof tiles take their place entirely. They can come in both monocrystalline and thin-film materials.

What are tempered glass tile solar panels?

As the name suggests, they are solar panels that look like roof tiles. The tiles or solar slates can replace roofing materials or shingles, allowing a roof to turn into a sustainable energy-saving mechanism. Tempered glass tile solar panels can be as durable as standard roofs, making them feasible for many roofs.
