

Solar Energy South Africa

Global energies Liechtenstein

Overview

What is energy in Liechtenstein?

Energy in Liechtenstein describes energy production, consumption and import in Liechtenstein. Liechtenstein has no domestic sources of fossil fuels and relies on imports of gas and fuels. The country is also a net importer of electricity.

Does Liechtenstein have solar energy?

In recent decades, renewable energy efforts in Liechtenstein have also branched out into solar energy production. Most solar energy is generated by photovoltaic arrays mounted on buildings (usually roofing), rather than dedicated solar power stations.

What is Liechtenstein's national power company?

Liechtenstein's national power company is Liechtensteinische Kraftwerke (LKW, Liechtenstein Power Stations), which operates the country's existing power stations, maintains the electric grid and provides related services. In 2010, the country's domestic electricity production amounted to 80,105 MWh.

Is biomass a source of electricity in Liechtenstein?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Liechtenstein: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

How much electricity does Liechtenstein use?

In 2010, total consumption of electricity in the Principality of Liechtenstein amounted to roughly 350,645 MWh. In 2015, total consumption of electricity in the Principality of Liechtenstein amounted to roughly 393.6 million kWh.

What percentage of Liechtenstein's electricity comes from non-renewable sources?

In 2016, non-renewable sources accounted for 67,35 % and renewable sources for 32,47 % of Liechtenstein's electricity supply. Energy production from non-renewables consisted of 56,88 % foreign imports of electricity produced by nuclear power, and 0,65 % of electricity produced in Liechtenstein from imported natural gas.

Liechtenstein

Renewable heat. Renewables also have an important role in providing heat for buildings and industrial processes. To achieve decarbonisation and energy saving objectives, many countries are encouraging individual homes and buildings to shift from fossil fuel heating systems such as gas- or oil-fired boilers to systems like heat pumps which are much more efficient and can be ...
