Greenex energy Nepal

Overview

Who is greenex energy?

Greenex Energy is an emerging leader in base oils and petrochemical products trade, distributing them to serve the markets in Africa, Europe, Asia and the Americas. The company stands for high-quality commodities.

Can Nepal produce green hydrogen?

By leveraging its abundant hydroelectric resources, Nepal can produce green hydrogen to meet its energy needs and reduce its carbon footprint. The applications of green hydrogen in energy storage, transportation and industrial processes are vast, offering a cleaner alternative to fossil fuels.

What is the role of Green Hydrogen Policy in Nepal?

The ongoing discussions and debates show the critical role of this policy in the significant advancement of Nepal's green hydrogen sector. The policy aims to harness green hydrogen produced from renewable energy sources as an energy alternative, contributing to carbon neutrality, energy security, and sustainable economic growth.

Could green hydrogen be a game-changer for Nepal?

So, green hydrogen can potentially be a game-changer for Nepal as it seeks to combat climate change and transition to a low-carbon economy. By leveraging its abundant hydroelectric resources, Nepal can produce green hydrogen to meet its energy needs and reduce its carbon footprint.

Can Nepal provide green energy to South Asia?

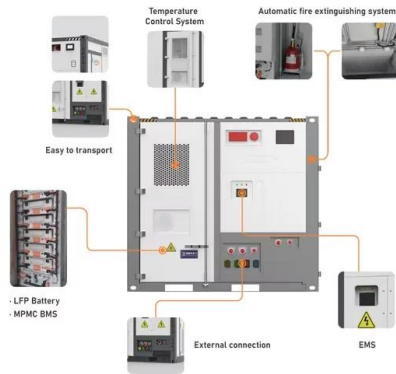

Nepal could play a crucial role in providing green energy to South Asia by reducing the output of black carbon that accelerates climate change and pollutes the majestic Himalayas. But how can we ensure Nepal's energy production is in harmony with nature and local communities?

FMO's 'Environmental and Social' sector initiative is a good start.

Is Nepal a good place to invest in green energy?

Nepal - the landlocked Himalayan country, sandwiched between Asia's two most populous nations, India and China - has the potential to hold a key position on the subcontinent when it comes to green energy. Its rivers that sprout from the highest mountains in the world, offer a vast potential for hydropower in the region of 40.000 megawatt.

Greenex energy Nepal

Green energy in Nepal

Despite its abundant renewable energy potential, Nepal still currently imports 500 MW of (coal-fired) electricity from India throughout the year. FMO co-financed two hydropower projects in Nepal. Lower Solu in 2014 and Upper Trishuli in 2019. As the largest private sector hydropower project in the country, Upper Trishuli 1 - still under

Green hydrogen potentials from surplus hydro energy in Nepal

The surplus energy in the context of Nepal can be provided at a lower cost to produce green hydrogen, otherwise the energy would be spilled. Fig. 4 indicates the cost of production of hydrogen for business-as-usual or scenario 1 (S1-UEC) as discussed in the methodology section. The electricity cost to produce 1 kg of hydrogen is around US \$5.91
