reached 10.3 billion cubic

Vietnam's weak grid a barrier to direct power purchase policy

Its poor energy infrastructure impedes the integration of new capacity from RE projects. Vietnam's direct energy purchase policy could be a gamechanger in the push for renewable energy (RE) production in the coming years, but the government should ensure grid connectivity to accommodate a surge in capacity, according to energy analysts.

Vietnam

Renewables: Significant plans exist to integrate more renewable energy into the Vietnam's energy mix. These plans require regulatory measures, grid capacity development, prevalence of baseload thermal sources, and battery storage. **Nuclear Power:** In November of 2016, the Vietnamese government postponed its nuclear power program.
