Gro energy Jersey

Overview

Who are Jersey Energy?

Jersey Energy are specialists in energy auditing and surveying. They are also experts in commercial strategies towards energy efficiency and the only certified BREEAM assessors within the Channel Islands. They offer low energy, efficient, and cost-effective solutions tailored to your requirements. Jersey Energy is not Jersey Gas.

How is energy flow measured in Jersey?

The overall flow of energy in Jersey may be examined by combining all the individual commodity balances into an “energy balance” which shows the energy flows from production to final use, including movements between fuel categories.

How is energy supplied to Jersey?

Energy is supplied to Jersey predominantly through imports; there is also a small amount of on-Island production. The primary supply of energy is either distributed to consumers in its original form or is transformed into different sources of energy; for example, petroleum products can be burned to generate electricity.

How does Jersey's energy data work?

Jersey's energy data is submitted annually to the compilers of the UK's national greenhouse gas inventory, Aether, who independently verify and validate the data using internationally agreed methodologies.

Who is Islands Energy Group?

Islands Energy Group is made up of three businesses based in Guernsey, Jersey and the Isle of Man – Guernsey Energy, Island Energy and Isle of Man Energy. It is the only gas supplier for domestic, commercial and industrial customers in the islands. It also sells domestic appliances including cookers

and washing machines.

What percentage of Jersey's electricity is imported?

Since 1994, the overall public electricity supply^{13 13} and the proportion of electricity imported into Jersey has generally increased, see Figure 6. Throughout the 1990s imported electricity accounted for between 40% and 60% of Jersey's public electricity supply. In 2022, this proportion was 95%.
