Should you choose a lead acid battery for solar storage?

A lead acid battery is a kind of rechargeable battery that stores electrical energy by using chemical reactions between lead, water, and sulfuric acid. The technology behind these batteries is over 160 years old, but the reason they're still so popular is because they're robust, reliable, and cheap to make and use.

Comprehensive Guide to Solar Lead Acid Batteries: Selection,

...

Lead acid batteries play a vital role in solar energy systems, as they store the electricity generated by solar panels for later use. When sunlight hits the solar panels, it generates DC (direct current) electricity.. But, this electricity must be converted into AC (alternating current) to power most household appliances. During periods of low sunlight or at night, the stored ...
