GRADE A BATTERY

LiFepo4 battery will not burn when overcharged, over discharged, overcurrent or short circuit and can withstand high temperatures without decomposition.

Build a Battery ... Where to start? , Page 4 , DIY Solar Power Forum

The cost of building a box and BMS is same as one of these DIY boxes from China. When you add up all the little parts you need ends up being more. About a week ago I decided to buy again this time I went with same cells 16 280AH EVE cells for \$54 a cell and I added Apexium DIY box with the JK inverter BMS JK-PB2A16S20P for \$400. \$1264+325

[Beware of the APEXIUM BOX Connectors](#)

My factory-assembled Apexium 280A box with cables. I suspect the mating between the plug and socket is electrically poor and not substantial enough for the loads it is meant to carry. At least

in my unit it always felt like the plug connected to the socket easily with hardly any mechanical

custom made battery box for eve LF280K cells

A fully custom box restricts the potential usecases. Whereas someone prefers a box-on-wheels, others prefer 19". From an economical point of view it does make a lot of sense to make it kind-of modular: 19" wide, and provide options. That makes the bare enclosure more profitable since you can make more of them than multiple custom options

Apexium 280 battery box gap next to cells , DIY

Ray Builds Cool Stuff's videos on the Apexium 280 battery box and other battery builds have been very helpful to me. I just got some MG 847 in the mail, and plan to use it to reduce resistance in the connections. I plan to sand the contacts WITH the MG 847 to prevent any new oxidation from forming immediately after the sanding.

Dongguan Anzhi Electronic Technology Co., Ltd.

Brand New Standing Apexium 14.3kwh Battery Box 16s 51.2v 280ah Diy Kit Lifepo4 Solar Energy Battery metal empty Case. FOB: \$89.99 - \$99.99

PIECE. Apexium 24V 8s LFP DIY Kits 280ah Lifepo4 Battery Box For Energy Storage With 24V200A BMS Without Cells DIY 24V Battery Case. \$13.90 - \$39.90.

Apexium 280 batteries not playing well in parallel

These have the apexium bms, which I understand it actually the seplos bms. I configured the dip switches according to the document: Battery 1 (master): Battery 2: Battery 3: If I flip these all to off and connect each individually to my laptop and battery monitor, they show up and fill in the data as expected.
