Making the Most of Hot Boxes and Heated Containers

Typical products stored in hot boxes and heated containers. Much like cold storage, hot boxes are typically used to store produce or products at a controlled temperature - the only difference being one cools whilst the other heats. Nowadays, many companies are starting to use heated containers to warm through and even cook particular products

some wintertime project, I fire that up and it's comfortable in ten minutes or so. The problem ...

Our Ultimate Food Storage Guide , The Container Store

A good rule of thumb: if heated food isn't refrigerated within two hours of mealtime, it's no longer fresh. Use clear, leakproof, airtight containers for long-term storage; label with the contents and use-by date. (Glass containers are less likely to stain than plastic ones.) Whenever possible, vacuum-sealed containers help your foods last even

Top-Quality Shipping and Storage Containers
