# Hohhot Photovoltaic Panel Installation

## Overview

---

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

What is needed to install solar panels on UK homes?

Here's a quick guide to what's needed to install solar panels on UK homes: An installer should visit to determine if the property is suitable for solar panels. They will look at the size and orientation of the roof to decide the best location and angle for installing panels.

Where should solar panels be installed in the UK?

Solar panels harvest solar energy in almost all circumstances, but maximising the benefit is all about looking at your own home's situation. As a northern hemisphere country, the best orientation for solar panels in the UK is south-facing.

How do I find a qualified solar panel installer?

An installer should be fully qualified and certified. To find an expert, qualified solar panel installer, start your search by reading our hiring guide and then search for a recommended installer on Checkatrade. How do solar panels work?

Solar panels benefit from direct sunlight but still generate using daylight, not heat.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the

rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

Can solar panels be installed vertically or horizontally?

The panels themselves can be installed vertically or horizontally. Once the mounting system is set up, it's time for the moment we've all been waiting for: getting the solar panels onto the roof. Your installer will start by placing the solar panels onto the mounting system, without fully securing them just yet.
