What are the benefits of switching to solar PV?

There are several benefits of switching to solar PV: Using solar energy means you will be reducing your electricity bills. The more solar energy you generate, the less you'll be paying for electricity; Solar energy systems typically don't require much maintenance, cleaning twice a year should suffice.

Are solar panels a good investment?

Using the sun's free energy, solar panels can help achieve this. Once you've covered the upfront cost of installation, you'll have cheaper bills for years to come. Reduce your carbon footprint. By harnessing low carbon solar electricity, a typical home solar panel system could save around one tonne of carbon per year.

Why should you choose a solar panel system?

Sunlight is free, so once you've paid for the initial installation, your electricity costs will be reduced. Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK.

What is a solar PV system?

Power generated by solar panels can be used in a home. Here are some quick definitions to help you. Solar photovoltaic (PV) systems are made up of several panels. Each panel has many cells made from layers of semi-conducting material, usually silicon.

Do solar panels save energy in the UK?

Depending on where you live in the UK, the solar panel system could save an average of around one tonne of carbon per year, according to Energy Savings Trust. Year-round efficiency: Solar panels can be efficient year-round in the UK, despite the country's reputation for cloudy weather.

## Are solar thermal panels worth it?

Solar panels absorb the sun's heat and convert it into electricity, whereas solar thermal systems transform the sun's energy into heat for household water. Whilst solar panels' popularity has exploded in recent years, some have questioned whether solar thermal panels are worth it, given they can only save an average of £1,350 over their lifetime.
