

Solar Energy South Africa

Home Solar Photovoltaic Panel Selection

Overview

How to choose your solar panels in 3 steps
Determine solar panel efficiency and compare it to the industry average of 16-18%
Check solar panel manufacturer warranties against an industry average of 10-25 years.
Compare the cost to relative efficiency - efficiency is important, but the most efficient panels aren't always the best value.
How do I choose the best solar panels in the UK?

Efficiency standards: Selecting solar panels with high efficiency ratings will help you optimise your energy production. The best panels in the UK generally exceed 20% energy efficiency, providing more power output per square metre of roof space.

What are the different types of solar panels for sale in the UK?

Solar panels for sale in the UK are available in various designs, so you can choose a style best suited to your home. Thin-film panels have a much thinner profile compared with monocrystalline or polycrystalline panels. Monocrystalline panels are black in colour, whereas polycrystalline panels are blue and speckled.

Should you buy solar panels in the UK?

Unpredictable energy prices and a focus on greener energy have seen more and more UK homeowners buy solar panels in recent years. Whether you're looking to lower your energy bills, minimise your carbon footprint, or reduce your reliance on the national grid, solar panels make a great choice.

Which solar panels are best for residential installations?

Currently poly-crystalline are the most common panels for residential installations as they tend to provide the best balance of cost and efficiency. However where roof space is limited, mono-crystalline can also be a good choice. Thin-film solar panels are currently not very common in rooftop PV systems due to the large area they require.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.
